

STATE DATA CENTRE
Department of Information Technology & Electronics
Government of West Bengal
(ISO/IEC 20000-1:2011 and ISO/IEC 27001:2013 Certified Tier-III Data Centre)

Part I : Undertaking for VPN Access

Application Name : LEARNITY KNOWLEDGE ENGINE

I understand the inherent risk/threat involved in using VPN connection for accessing Production Server and State Data Centre (SDC) cannot be held responsible for any data loss/security breach. The VPN service in Production Server would be used to resolve only the emergency & critical issues of the server.

I also understand that the West Bengal State Data Centre (WBSDC) has no current mechanism in place to validate and maintain the security level of the remote host (workstation) that the VPN User uses to initiate a VPN tunnel. As a result, I understand that there is an elevated risk of virus attack to network and server itself.

I further furnish that:

1. The VPN account will not be used for running script on database(s) and any other activities which might pose a security threat to the destination server or to the SDC network in general.
2. The concerned VPN User would be solely responsible/accountable for any undesired or damaging activities carried out through his/her VPN User and SDC has full authority to take any appropriate actions against the concerned user(s).
3. Up to date Virus protection would be ensured in the VPN Client machine.
4. The respective department head will also inform SDC authority immediately in case designation/role of User changes or he/she is no more attached with the project for which VPN connection was issued.

I have read and understand the above and agree to abide by the rules and regulations. I further understand that disclosure of any information or non-compliance with the terms and conditions may result in the discontinuation of the WBSDC VPN facilities.
